

# VINAY UPPIN

Skilled Developer in UI/UX, Angular, Typescript, JavaScript

+91 91643 43762 @ vinuppin@gmail.com

https://www.linkedin.com/in/vinuppin/ Bengaluru, IN

## SKILLS

Front-End : Angular 7/12/14/17 · HTML · CSS ·

SCSS · JavaScript · TypeScript · RxJS · NgRx ·

Bootstrap · Material UI · jQuery · Webpack ·

Micro-Frontend

Back-End & Tools : Node.js · Express ·

PostgreSQL · MongoDB · SpringBoot ·

RESTful APIs Integration

DevOps : Git · GitLab CI/CD · Docker ·

Kubernetes · Agile Methodology · Puppeteer

Other Tools : Figma · JIRA · Postman ·

Confluence · Resource Override

## KEY ACHIEVEMENTS

### T-Performer of the Year Award

Received the T-Performer of the Year Award (T-Systems – FY-22) for outstanding performance

### ACE Client and Customer Award

Awarded the ACE Client and Customer Award for outstanding contribution to client's business outcomes at Accenture

### Pinnacle Award

Received Pinnacle Award for sense of dedication and high-performance delivery at Accenture

## CERTIFICATION

Azure Fundamentals AZ-900

Front end System Design

## EDUCATION

### Bachelor of Engineering in Computer Science

K.L.E College of Engineering and Technology

08/2009 - 05/2012

VTU

## SUMMARY

- 12+ years of experience in designing and developing user-friendly, responsive web applications.
- Strong expertise in Angular and modern frameworks (6+ years).
- Experience with micro front-end architecture (Webpack Module Federation).
- Skilled in UI/UX for enterprise-level applications.
- Adept with dev tools like VS Code, Git, JIRA in Agile teams.
- Proficient in optimizing performance and writing unit tests.

## EXPERIENCE

### Senior Consultant/Lead

06/2021 - Present

#### T-Systems ICT India Pvt Ltd

Bengaluru, IN

Leading consultancy services in technology

- Designed and deployed micro front-end modules as standalone Angular applications, improving modularity and reducing deployment times by 30%
- Configured Webpack Module Federation for dynamic loading of remote services, enabling independent deployments and streamlining CI/CD workflows
- Collaborated with stakeholders across engineering and business teams to clarify requirements, reducing change requests and accelerating delivery timelines
- Led a team of 7 developers, mentoring on Angular best practices and modern frontend architecture, resulting in a 40% drop in production issues
- Architected a scalable enterprise framework tailored for airport operations and adaptable to other transport sectors, cutting future onboarding time for new clients by 50%
- Resolved critical memory leaks during module federation integration, improving application performance by approximately ~40%
- Conducted multiple UI POCs using Figma and established design patterns, enabling a consistent user experience and faster design sign-off

### Application Development Team Lead

06/2019 - 06/2021

#### Accenture Solutions Pvt Ltd

Bengaluru, IN

Providing technology and consulting services

- Enhanced scheduling accuracy by {15%} for AODB platform, improving real-time resource visibility for airport stakeholders.
- Integrated front-end with multiple critical modules (ATC, FRMS, HRMS) to ensure seamless real time data flow, reducing manual coordination efforts by 35%

### Application Development Senior Analyst

12/2016 - 06/2019

#### Accenture Solutions Pvt Ltd

Bengaluru, IN

Providing technology and consulting services

- Improved airport operations efficiency by {25%} by developing core AMS platform features.
- Reduced flight delays by {15%} through real-time dashboard visualization in iPax for operational insights.
- Implemented resource allocation features in TAM, enabling centralized scheduling of airport counters and staff, which improved utilization efficiency

### Senior Software Developer

04/2015 - 12/2016

#### iProcess Info India Pvt Ltd

Bengaluru, IN

Specializing in software solutions for safety and operations

- Job Safety Analysis (JSA) is a mobile app that improves safety in high-risk workplaces by breaking tasks into steps, identifying hazards, and applying preventive measures
- The Electronic Work Permit (eWPT) module ensures expert review and enforces safety measures based on JSA-identified risks.

### Associate Software Engineer

01/2013 - 03/2015

#### Spundhan Softwares Pvt Ltd

Belgaum, India

Providing enterprise software solutions

- ENPAQ Enterprise Manager provides a clear, structured view of the network, monitors both systems and network activity, and generates real-time and historical reports
- The application offers full control over various network security features, including firewall settings, gateways, antivirus/spam protection, intrusion detection (IDS), and Wi-Fi security
